

Hennepin Healthcare-Regions Hospital

We train the next generation of psychiatrists to serve our community. Our dedicated faculty, patient diversity, and advanced facilities make Hennepin Healthcare and Regions a great place to develop your skills as a member of a diverse interdisciplinary team. Established in 1996, our program provides exceptional clinical training, from emergency rotations and inpatient service to outpatient work in private practice, community clinics, and in-home consultations, preparing you for practice in almost any clinical setting. Almost 2/3 of our graduates are practicing in the Twin Cities metro area or nearby in Minnesota or Western Wisconsin, many of them on staff in the Hennepin or Regions/HealthPartners systems. Both Hennepin Healthcare and Regions Hospital serve the immigrant and underserved population. Our residents serve patients of all cultural and socioeconomic backgrounds. Residents also collaborate with physicians, social workers, and therapists, fostering learning at all levels.
