

Advocate Lutheran General Hospital

The ALGH Psychiatry Residency's mission is to provide quality didactic and clinical training to interested and enthusiastic residents in order to cultivate highly skilled psychiatrists with an ethical and humane approach to patient care.

Our educational home is Advocate Lutheran General Hospital, a 638-bed teaching hospital and Level I Trauma Center located adjacent to Chicago on the northwest side. We have over 1,300 physicians on staff representing 84 specialties and subspecialties. Within this educational environment we provide a close-knit training experience and a collegial culture between residents and faculty.

We offer all of the following clinical rotations on-site: Primary Care & Neurology, Addictions, Adult Inpatient Psychiatry, Adult Partial Hospital Child and Adolescent Inpatient Psychiatry, Child and Adolescent Partial Hospital Consultation/Liaison Psychiatry, Adult Outpatient Psychiatry, and ECT.

We are pleased to announce that ALGH will expand its training capacity to four residents per year starting with this year's Match.
