

Tulane

New Orleans is a wonderful city and great place to work and train. It is a very diverse city, and this is mirrored in the patient population. Our mission is to serve the underserved, including taking ownership of, and advocating for, your patients. It is a top priority to provide an array of experiences with a wide range of pathology in order to prepare all of our residents to be able to pursue any career path they choose after graduation. The Department has several combined program residents and faculty which broadens the educational experience for everyone. The sub-specialty tracks available at Tulane include Triple-Board (psychiatry-child/adolescent psychiatry-pediatrics) and Internal Medicine-Psychiatry. Fellowships include child & adolescent, forensic psychiatry, and a VA Chief Resident in Quality and Patient Safety position.
