

## **Texas A&M Psychiatry Residency Program**

Welcome to the Psychiatry Residency Program at Texas A&M College of Medicine! The mission of the Psychiatry Residency Training Program is to develop outstanding psychiatrists well prepared to become excellent clinicians and leaders in all realms of psychiatry who are committed to provide evidence-base, compassionate, patient centered care, innovative discovery, advocacy and leadership. Program graduates will be prepared for any career opportunity and challenge providing care in the state of Texas and beyond. Residents training in the program will have particular experience with service in rural communities, telepsychiatry, integrative care, and treating the culturally diverse, under-served and military populations.
