

## **Garnet Health Medical Center**

The goal at Garnet Health Medical Center is to foster development of the knowledge, clinical and professional skills, compassionate behavior, and caring attitudes among its residents that are requisite to becoming an effective psychiatrist. Our psychiatry residency program is designed to fulfill each of the standards for residency training in general psychiatry as approved by the American College of Graduate Medical Education (ACGME). "The mission of the Graduate and Undergraduate Medical Education Program at Garnet Health Medical Center is to prepare residents and students to be excellent physicians and well-developed individuals by educating them in the fundamental concepts, knowledge, and practical applications of skills taught by a team of dedicated medical professionals. We welcome your interest in our ACGME approved Psychiatry Residency Training Program at Garnet Health Medical Center. We offer a dynamic program grounded in clinical experience and didactics, with an integrative care mission that will prepare our graduates to demonstrate the knowledge, clinical skills and empathy that is requisite to becoming an effective psychiatrist. Our goal is that these experiences will lead to a well-rounded and rewarding career in psychiatry." - Dr. Ulrick Vieux-Chairman and Residency Program Director We have dedicated passionate staff members who are committed to providing the best educational opportunities for all learners in our institution. Our physicians have trained at world- class institutions in every medical and surgical specialty. Residents receive supervision from our staff members and have opportunities to engage in clinical research projects. Our didactic curriculum covers all psychiatric disorders and the major treatment modalities. The program is offered in a progressive, collegial atmosphere while embracing new challenges to our field.
