

## **University of Nebraska Medical Center**

Our new program opened in 2020. We offer rigorous training that blends academic excellence and front-line clinical experience. Our clinical partner, Nebraska Medicine, is a well-established academic health system in the region, consisting of 809 licensed beds at its two hospitals, more than 1,000 physicians, and 40 specialty and primary care clinics in Omaha and surrounding areas. The residency leadership and Department of Psychiatry are based at the extensively renovated Poynter Hall, the first building of the University of Nebraska College of Medicine which opened in 1913. The UNMC program has four areas of emphasis or “pillars” (Wellness, Inclusion, Subspecialty Clinical Experiences, and Experiential Learning in Psychotherapy) that describe our educational philosophy, also known as WISE. Our WISE residents will not only have excellent clinical training and didactics but will also be able to work effectively in teams and diverse healthcare systems while managing personal well-being. Please learn more about us through this website and our social media account (Twitter @UNMCPsychiatry.) Omaha and the department will have much to offer prospective residents.
