

The Rural Psychiatry Residency Program is committed to providing an inclusive, safe, and innovative learning environment in order to train the next generation of psychiatrists for excellence in clinical practice, scholarship and leadership, and service to our communities. Our vision is to enhance the health of our communities by providing outstanding psychiatric care in the rural and urban settings we serve, while addressing health care inequities through community outreach, the education of health care professionals, leadership, and scholarly inquiry. We train our residents to provide compassionate, high quality care in rural and underserved areas.
