

Allegheny General Hospital

The Psychiatry Residency training program at Allegheny General Hospital provides a wide range of clinical experiences designed to help our residents become excellent clinical psychiatrists. Our strengths include child and adolescent psychiatry, psychotherapy, women's mental health, street psychiatry, and consult liaison psychiatry. Our faculty are dedicated to a biopsychosocial understanding of our patients. Residents rotate at several sites and will work with patients from a variety of backgrounds. There is a great deal of elective time available in the 4th year, and we do also have a child and adolescent fellowship into which our residents can fast track. Many of our graduates continue to live and work in the Western Pennsylvania area. Pittsburgh is a vibrant and interesting city, with a relatively low cost of living.
