

## **WellSpan Health/York Hospital Psychiatry Residency Program**

WellSpan Health's four-year psychiatry residency training program offers you broad clinical experience in behavioral health services, which we provide across an extensive continuum of care throughout the region.

WellSpan Health is the regional leader in caring for individuals, families and communities in southcentral Pennsylvania.

Accredited by the Accreditation Council for Graduate Medical Education (ACGME), the program is primarily located at WellSpan York Hospital — the health system's flagship hospital — and surrounding ambulatory locations. Some core rotations will take place at unique behavioral health settings in beautiful Lebanon and Lancaster Counties. You'll experience enriched training by providing care to a diverse community across multiple locations, settings and models of care.

Our psychiatry residency program will provide supportive and comprehensive training that prepares residents to be excellent psychiatrists, passionate advocates and future leaders in psychiatry and healthcare. Please review our website which provides you with detailed information about our mission, clinical rotations, didactic curriculum, and faculty.
