

El Rio Health Psychiatry Residency

The psychiatry residency program at El Rio Health strives to provide a comprehensive educational experience that integrates clinical excellence, research, advocacy, and community engagement to address the mental health needs of underserved communities. Our program aims to produce psychiatrists who are committed to providing high-quality patient care, advancing the field through research and scholarly activity, and promoting mental health equity. As an FQHC, we are committed to providing high-quality, culturally competent care to all our patients, regardless of their ability to pay. Our program's mission aligns with the larger mission of El Rio Health, which is to improve the health and well-being of our community through access to affordable, comprehensive, and quality healthcare. The psychiatry residency program hopes to train physicians who will promote the advancement of high-value care through scholarly work and lifelong learning and serve as future leaders in the field of psychiatric medicine.
