

## **Institute of Living/Hartford HealthCared (CT)**

To address the workforce shortage of Child and Adolescent Psychiatrists to meet the mental health needs of children, adolescents, and their families by training highly skilled physicians who are empathic, curious, knowledgeable, and dedicated to the highest principles of patient care.

To graduate advanced trainees who are completing their Child and Adolescent Psychiatry subspecialty training who will have the ability to be leaders in providing services to children, adolescents, and their families in multiple, diverse clinical settings or through academic teaching and/or research careers.

Central to our mission is to teach fellows to approach children, adolescents, and their families from a developmental and dynamic perspective that is patient-centered, culturally sensitive, and strengths-based.

To graduate fellows who practice independently with an awareness of inequities and injustices and who also actively engage in advocacy to address these issues.

To cultivate a mentor-rich learning environment which supports and ensures fellows to become well-rounded, skilled psychiatrists in both biological and psychotherapeutic treatment modalities.
