

Onvida Health Psychiatry Residency Program

Community Psychiatry Residency Program

Yuma, Arizona | 4 Residents/Year | ACGME Accredited 2025

Welcome to Yuma, Arizona—where sunshine, culture, and care come together. Our new ACGME-accredited psychiatry residency trains 4 residents each year to become skilled, compassionate psychiatrists with a focus on community mental health.

Based at Onvida Health, our mission is “Building a Healthier Tomorrow.” We care for people with severe mental illness and serve diverse, bilingual, and underserved communities.

What makes us different:

Small class size with close mentorship

Integrated training in clinics, hospitals, and the community

Focus on teamwork, leadership, and culturally responsive care

Work with patients from the U.S.–Mexico border region

Learn evidence-based care and system improvement

Residents gain hands-on experience in Onvida’s growing behavioral health programs—including inpatient psychiatry, outpatient therapy, and Spanish-language services.

You’ll work alongside doctors, nurses, and therapists to help patients live healthier, fuller lives. You’ll also help shape the future of care in a community that needs you.

Come train where you’re valued, supported, and part of something bigger.
