

## **University of Cincinnati Psychiatry Program**

Opening in 1823 as the country's first teaching hospital, UC Medical Center has an international reputation, bringing thousands of people, from the region and around the world, to Cincinnati to receive care from world-renowned physicians in state-of-the-art medical facilities. UC Medical Center is home to the region's only adult Level I trauma center and is consistently ranked a "Best" hospital by U.S. News & World Report.

After completing our program, residents are well prepared for careers in research, academia or clinical practice. Often residents continue with us to pursue specialized training in one of our four ACGME accredited fellowships in:

Addiction Psychiatry & Addiction Medicine Research

Child and Adolescent Psychiatry

Forensic Psychiatry

Geriatric Psychiatry

We also frequently hire many of our talented residents as faculty once they have completed their training.
