

Northeast Georgia Medical Center Psychiatry Residency Program

Northeast Georgia Medical Center (NGMC) is proud to offer an ACGME-accredited community-based, community-focused Psychiatry Residency program. Our program is the result of collaboration between Northeast Georgia Medical Center, Avita Community Partners, Peachford Hospital and various Northeast Georgia Health System (NGHS) integrated care clinics in various counties.

Our program's aim is to provide the skills, knowledge, experience, education and training to develop outstanding community psychiatrists and leaders who will enhance psychiatric services at all levels throughout Hall and neighboring counties. We are looking for pioneering residents with a dedication to community psychiatry to join us!
