

Boston University Medical Center Psychiatry Residency Program

The training program in the Boston University Medical Center Psychiatry Residency Program is designed to provide a breadth of knowledge of psychiatry, neurology, neuroscience, psychotherapies, and psychopharmacology. An integrated bio-psycho-socio-cultural model forms the basis of our approach. Our educational program progresses across four years of training from the basics in the PGY 1 year through advanced courses in the PGY 4 year. The Department of Psychiatry at Boston University Chobanian & Avedisian School of Medicine is nationally recognized for its strengths in serving diverse communities in Addiction Psychiatry, Post-Traumatic Stress Disorder, Anxiety Disorders, Cross-Cultural and Community Psychiatry, and Psychiatry Services..
