1970-1971

"AADPRT was in its infancy with much intrigue between different factions, particularly the East and West Coast. One person was nominated from each coast, but neither had enough votes to be elected president so I was the compromise candidate from the Midwest who didn't have enough enemies on either coast. There was a lot of tension between those who favored psychotherapy with those who favored... psychopharmacology." Daniel Offer, MD, AADPRT's third president

Recruitment, building trust among programs in the match. Suupporting NIMH in role as source of residency funding. Advocacy to bring back the requirement for a nedical internship in psychiatry training.

"When a small group of Residency Directors met in

Chicago in 1970, it was recognized that they had awe-

some responsibilities, but little control over budget and

program. The Department Chair controlled both. By

forming a national organization, it was thought that

influence could be created that would empower Di-

rectors. Little did we know that we would become the

constituency that would influence psychiatry, not only

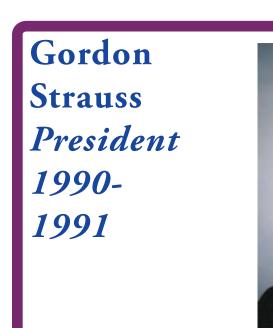

within the departments and hospitals in which our res-

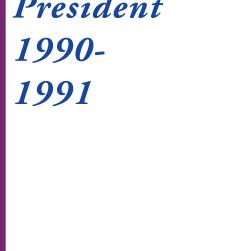

idents served, but also within the politics of the APA."

"At 10:54 a.m. Wednesday, February 28th, a 6.8 magnitude earthquake struck western Washington... At the time, Lucille and I were meeting with the hotel managers...and the room began to shake. When pitchers of ice water tilted and crashed to the floor, and the staff bolted for the door, it dawned on me that this was not an average event. The conference went on, but more than a few flights carrying AADPRT members, ready to land in Seattle, diverted, never to return. The attendance was low but the spirits were high."
