

Texas Tech University Health Sciences Center El Paso

The Department of Psychiatry – Transmountain is a new department of the Paul L. Foster School of Medicine. The department has clinical operations at the Texas Tech Physicians of El Paso at Transmountain clinic site. We collaborate and share resources with our sister facility at the Texas Tech University Health Sciences Center El Paso campus. Joining our program will ensure participation in providing mental health services to a wide-range of socioeconomic sectors, including a border community. Our patient base is highly diverse and includes patients privately insured, uninsured and underinsured; patients with serious, persistent mental illness as well as high functioning ones.
